Digital PDF

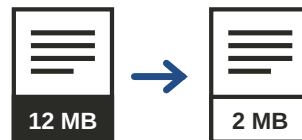

Scan or photo

Rotate

Delete page

Compress

Convert JPG PNG TIFF

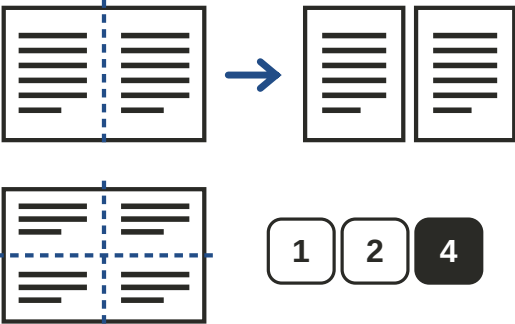

Save PDF, or images in one .zip

Pages to process

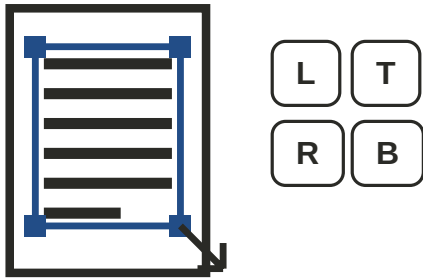

Every button acts on these pages.
Selected: type 1-3, 7

Split into 2 or 4

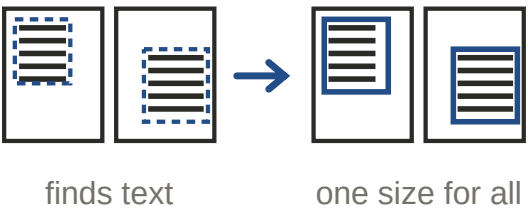

Drag each window to adjust.
Same size keeps them equal.

Draw a box by hand

Drag on the page instead of
Auto-detect. L T R B fine-tune edges.

How Auto-detect works

Finds the text on every page, then
crops all to the largest text block.

Anchor left / top

On: the box starts at each page's text.
Off: same place on every page.

Keep ratio

The crop keeps its shape —
e.g. your e-reader screen.

Keyboard and mouse

	open
	crop
	save
	undo
	redo
	previous / next page
	previous / next page
	turn pages
	delete pages
	zoom in / out
	reset zoom

Undo, Redo, Reset

Undo takes back any step.
Reset reloads your files
as they were opened.

Digital or scan: automatic

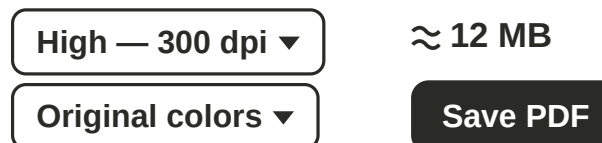

Set when you open, no choice needed.
Scan tools appear only for scans.

Filter strength

B/W or Sharpen: 1 is light,
3 is strong.

Output quality

For scans and image files. A digital
PDF saved as PDF stays vector:
sharp text, small file.

Settings

Appearance

colour scheme, font size, zoom

Output

file-name postfix, DPI, paper size

Behaviour

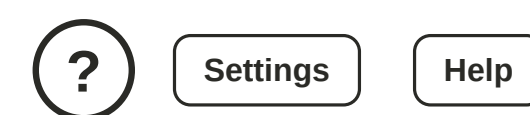

offline mode, undo depth, last folder,
ignore N outlier pages

Private, works offline

Files never leave your browser anyway.
Use “Offline mode” in Settings to avoid
any requests to the website.

Help

Help explains every control.
